

RE: MB Docket No. 04-233

Dear sirs,

I am deeply concerned with the "localism" campaign and the effect it could have on the only station I feel comfortable letting my children listen to - K-LOVE. K-LOVE is the only station playing contemporary music that I believe is safe to listen to at any time. The music is wholesome and uplifting possibly because it is not controlled by advertisers. Since it is commercial free, I don't have to worry about the programming being "polluted" by commercials and programming I would not want my family listening to. If K-LOVE is no longer available due to an LPFM station infringing on its space/frequency on the radio, my family will be left virtually no options for safe listening. I request you reconsider the "localism" effort and what impact it will have on K-LOVE, one of the few safe stations on the radio.
